

Muhammad Nasarullah

Date of birth: 16/07/1998 | **Nationality:** Pakistani | **Phone number:** (+92) 03233937672 (Pakistan) |

Email address: nasarullah.lak@gmail.com | **Github:** https://github.com/MuhammadNasarullah575/AI_Labs |

Whatsapp Messenger: 3414853259 |

Address: Roshan Plaza Office #5 Khanna Daak, 45551, Islamabad, Pakistan (Home)

● ABOUT ME

I'm Muhammad Nasarullah, as a computer engineer, I bring a combination of technical, analytical expertise and creative problem solving skills to any project. With a dedication to staying current with emerging technologies, I am committed to creating innovative solutions that make a positive impact.

● WORK EXPERIENCE

AI AND ML INTERNEE – DR KHURSHEED HASNAIN – 01/07/2023 – 30/08/2023 – ISLAMABAD, PAKISTAN

Internship at NCP (AITeC)

Duration: 1st July – 30th August 2023

During my internship, I learned the basics of Artificial Intelligence, Machine Learning, and Deep Learning. I worked with important libraries like Pandas, Numpy and Matplotlib.

I learned how to:

- Collect and label datasets
- Train models using the right libraries and tools
- Use YOLOv8 for detecting Fire, Flame, Spark, and Smoke
- Set up email alerts and alarms when any of these are detected

YOLOv8 is a fast and efficient model that works well even on low-computing devices.

TECH FELLOW – LEARNOBOTS – 13/05/2025 – 28/05/2026 – ISLAMABAD, PAKISTAN

1. Delivered STEAM-based learning sessions to students using hands-on and activity-based teaching methods.
2. Assisted in conducting technology workshops, coding sessions, and robotics activities.
3. Supported students in understanding basic concepts of science, technology, engineering, arts, and mathematics.
4. Collaborated with instructors to design engaging and interactive learning content.
5. Encouraged innovation, problem-solving, and creativity among students through practical projects.

ADVANCE WEB DEVELOPMENT (INTERNEE) – EXCELLENCE DELIVERED – ISLAMABAD, PAKISTAN

- Completed a 3-month Web Development Internship with a strong focus on Frontend Development.
- Developed responsive and user-friendly web pages using HTML, CSS, JavaScript, and Bootstrap.
- Worked on real-world projects to improve UI design, layout structuring, and website responsiveness.
- Enhanced problem-solving and debugging skills while fixing UI/UX issues in web applications.
- Gained practical experience in team collaboration, version control (Git), and project workflows.

● EDUCATION AND TRAINING

09/2020 – 09/2024 Islamabad, Pakistan

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING Institute of Space and Technology (IST) - KICSIT Kahuta

Final grade 3.23 CGPA out of 4.00

2018 – 2020

INTERMEDIATE KRL Model College Kahuta Campus

Final grade 709 out of 1100 (64%)

2016 – 2018

MATRIC KRL Model College Kahuta Campus

Final grade 966 out of 1100 (87%)

● **LANGUAGE SKILLS**

Mother tongue(s): **URDU**
Other language(s): **ENGLISH**

● **PROJECTS**

Library Management System | SQL

Developed a Library Management System using SQL to manage books, users, and transactions. The system supports book search, issue, return, and database operations, enhancing understanding of database design and SQL queries.

Auto Door opening using Passive Infrared Motion sensor (PIR)

Developed an automatic door system using a PIR sensor to detect motion and trigger door opening. The project showcases contactless entry solutions for smart homes and public spaces.

5 volt DC power supply using transformer, regulator and rectifier

Designed a 5V DC power supply circuit by converting 220V AC using a transformer, bridge rectifier, filter capacitors, and a 7805 voltage regulator. Commonly used to power low-voltage electronic devices.

House wiring (simulation in proteus)

Designed and simulated basic electrical circuits including lights, switches, and fans. Gained hands-on understanding of how wiring is done in real homes and how to safely connect electrical components in a circuit.

AI Based Fire Detection system (AI and ML)

Developed an intelligent fire detection system using computer vision and deep learning. The system uses the YOLOv8 model to accurately detect fire, flame, smoke, and spark in real-time video streams. It includes a custom-trained model on labeled datasets and integrates an alert system that sends email notifications and triggers alarms when fire-related activity is detected. Write here the description...

Clone of Netflix

- Developed a responsive Netflix Clone web application using HTML, CSS, and JavaScript.
- Designed a modern UI similar to Netflix with dynamic movie sections and attractive layout.
- Implemented responsive design to ensure compatibility across mobile, tablet, and desktop devices.
- Practiced frontend development skills including layout design, styling, and user interface structuring.
- Improved understanding of real-world web application design and component-based UI development.

● **SKILLS**

programming: Python, MATLAB and SQL | C++ |   Machine Learning | Html, Java, CSS | Matlab | Deep Learning,

● **COURSES & CERTIFICATIONS**

25/05/2011 – 25/05/2014
Hafiz e Quran

01/07/2023 – 30/08/2023
Internship certificate from AITech

07/05/2023
NUST EME olympiad speed wiring Certificate

26/03/2022
Visio Spark (Quiz Competition)

13/03/2023
Hitec University Taxila Qiraat competition

10/03/2025 – CURRENT
Advance Web Development

In the **Advanced Web Development** course from NAVTTC, I am learning both front-end and back-end development. On the front-end, I am working with HTML5, CSS3, JavaScript, and frameworks like Bootstrap to create responsive and interactive web pages. For back-end development, I am gaining hands-on experience with PHP, MySQL, and building RESTful APIs to handle user authentication

and data management. Additionally, I am learning to implement MVC frameworks like Laravel for better code structure and easier development.

● **EXPERTISE**

Management Skills

Computer Vision

Custom Model Development

Automation and Optimization

Data Processing and Analysis

Team Lead

Layout Designing and development
